# Korada Chandana Priya

AI/ML Engineer | Python · NLP · LLMs · RAG
chandanapriyaaa@gmail.com | +91 8977268173 | linkedin.com/in/kchandanapriya | github.com/chandanapriyaaa

## Summary

Computer Science undergraduate with hands-on experience in NLP and LLM applications: Telugu text corpus preparation and tokenizer design at VISWAM.AI (with IIIT-H), and a RAG-based trade compliance copilot with human-in-the-loop review. Also built ETL pipelines and dashboards at DRDO. Skilled in Python, PyTorch, TensorFlow, Hugging Face, and scikit-learn, with a focus on evaluating models rigorously and shipping them into usable products.

## Education

**GITAM, Visakhapatnam** **Aug 2023 – Aug 2027**
*B.Tech in Computer Science Engineering; CGPA: 8.56*

**Sri Ramanuja Vidya Mandir, Visakhapatnam** **Jun 2021 – Jun 2023**
*MPC Intermediate (12th); Percentage: 85.6%*

**ETASI Timpany School** **2012 – 2021**
*ICSE (10th); Percentage: 91.5%*

## Experience

**DRDO, RCI (Research Centre Imarat)** **May 2026 – Jun 2026**
*Summer Research Intern – Data Engineering & Analytics* *Hyderabad, India*
– Built an end-to-end data warehouse for RCI's intranet, from ingestion to visualization, using Apache NiFi, ClickHouse, and Apache Superset.
– Automated ETL pipelines in NiFi to extract, clean, and load source data into ClickHouse, replacing manual data pulls with scheduled, repeatable flows.
– Wrote SQL queries and aggregations to power interactive Superset dashboards that let internal users track and drill into key operational metrics.
– Containerized the stack with Docker and scripted data transformations in Python, collaborating in a team of three.

**VISWAM.AI (in collaboration with IIIT-H)** **Jun 2025 – Nov 2025**
*AI Developer Intern* *Hyderabad, India (Remote)*
– Cleaned, deduplicated, and normalized large Telugu text corpora, and designed tokenization and vocabulary using Hugging Face Tokenizers and FastText.
– Worked with research mentors and open-source contributors on model architecture, training configurations, and deployment strategy.

**MedTourEasy** **Jun 2025 – Jul 2025**
*Data Analyst Trainee* *Remote*
– Performed exploratory data analysis and feature engineering on a chemical compound dataset to build a classification model in Python (Pandas, Scikit-learn).
– Compared candidate models using accuracy, precision, recall, and F1-score, and documented findings for model selection.

## Projects

**MAS-Compliance: Trade Compliance Analytics Copilot** | *PostgreSQL, SQL, TypeScript, Next.js, Redis, RAG, Llama 3.3*
– Built a six-stage pipeline (intake, classify, cross-check, duty, confidence gate, doc generation) that turns export invoices into HS codes, DGFT scheme eligibility checks, and itemized duty calculations.
– Designed a rule-based confidence score combining retrieval similarity and multi-sample agreement; cases below a 0.85 threshold route to a human review queue instead of being auto-approved.
– Built an operations dashboard with throughput metrics, distribution charts (histogram, donut, radar), and a filterable audit log, backed by PostgreSQL schemas, SQL migrations, and an accuracy evaluation script.

**Twitter Sentiment Analysis (Pfizer Vaccine)** | *Python, Pandas, NLTK, Scikit-learn, Seaborn*
– Cleaned and analyzed a Kaggle dataset of vaccine-related tweets and classified sentiment as positive, negative, or neutral using TF-IDF features.
– Benchmarked Logistic Regression, SVM, Random Forest, Naive Bayes, and LSTM models on precision, recall, F1, confusion matrices, and ROC curves; visualized trends with Seaborn and word clouds.

**Concrete Strength Prediction** | *Python, Scikit-learn, Support Vector Regression*
– Built a regression model to predict concrete compressive strength from mix composition and curing age, handling missing values, IQR-based outlier removal, and feature scaling.
– Tuned linear, polynomial, and RBF kernels with GridSearchCV and evaluated with MAE, MSE, and $R^2$ on an 80/20 train–test split.

**NextGen-AI** | *Python, BeautifulSoup, TensorFlow, Keras*
– Collected job-market data by web scraping (BeautifulSoup) and open-source job APIs, and built a recommendation engine for student placement preparation.

## Skills

- **AI/ML**: TensorFlow, PyTorch, Keras, NLTK, Hugging Face, LLMs & RAG
- **Languages & Querying**: SQL, Python, C, Java
- **Data Analysis**: Pandas, NumPy, Scikit-learn, EDA, Regression, Classification, Statistical Evaluation, Excel
- **Data Engineering & Databases**: ETL, Apache NiFi, ClickHouse, PostgreSQL, Redis, Docker, Git
- **Visualization & BI**: Apache Superset, Matplotlib, Seaborn, Streamlit

## Leadership & Engagement

**Meta Developers Communities** | *Dataverse Domain Member*
– Worked on a Speech Emotion Recognition project using acoustic feature extraction and multi-head attention for real-time emotion detection in customer-service and virtual-assistant use cases.

**GITAM Model United Nations (GMUN)** | *Delegate*
– Represented Switzerland (IMF) on international economic policy and Turkey (UNODC) on drug control, building public speaking, negotiation, and stakeholder communication skills.

## Certifications

- **Advisory Launchpad Program**, PwC Acceleration Center India, August 2026
- **Foundations of AI & ML**, Microsoft (Coursera), 2025
- **Introduction to Large Language Models**, Google Cloud, 2025
- **Computer Networks Basics**, Cisco Networking Academy, 2025

## Honors & Awards

- Secured 6th place in TechXcelerate Hackathon, 2023 for submitting Yogalax.
- Contributed to the MDC club technical domain, which went on to win two awards at ACE Awards GITAM.
- Participated in CODE HER hackathon, GITAM, 2025.
